Front-End Developer

Work History

Software Developer

FlightSafety International eLearning Department

April 2016 - July 2019

Worked on a course UI overhaul, uplifting it from Adobe Flash to a fully responsive HTML and Javascript UI, allowing the company to deliver courses on a wider range of devices, and to integrate different types of media and features into the courseware

Assisted with the design process, and was responsible for all the styling and writing all Javascript functionality.

Building course features including various quizzing/testing features, test-out features that provided users with prescribed learning paths, and gamified branching scenarios.

Design and development of web and mobile applications to be used in the field, including fatigue assessment and international travel assistance applications.

Peer Tutor

Sheridan College Library Services

November 2015 - April 2016

Mentored peers and offered guidance with coursework and concepts relating to HTML, CSS and Javascript.

Courseware Developer & Designer

FlightSafety International eLearning Department

May 2012 - August 2015

Developed video content for eLearning courseware.

Designed layouts for associated courseware materials and marketing materials including course handouts, Powerpoint presentations, promotional email campaigns, brochures, and web banners.

Assisted with instructional design duties, including storyboarding, writing assessment questions, and facilitating content reviews.

Volunteer History

Mentor/Event Volunteer

Canada Learning Code (previously Ladies Learning Code)

December 2015 - present

Supporting learners in single day workshops covering basic computer skills, HTML/CSS, Javascript/jQuery, building browser extensions, and working with Shopify/Liquid.

Mentor

CoderDojo Toronto

May 2017 - present

Help with monthly meet up administrative duties, and mentor participants working on projects ranging from Scratch games, HTML/CSS pages, and hardware (i.e. NFC tags, Arduino).
